### MAGIC RECTANGLE

THREE VERTICAL LINES, GOING FROM LESS TO MORE:

$$7+4+1=12=3$$

$$8+5+2=15=1+5=6$$

$$9+6+3=18=1+8=9$$

THE THREE HORIZONTAL LINES:

$$1+2+3=6$$

$$4+5+6=15=1+5=6$$

$$7+8+9=24=2+4=6$$

THE TWO DIAGONALS:

$$7+5+3=15=1+5=6$$

$$9+5+1=15=1+5=6$$

9 IS THE ONLY ODD NUMBER THAT CAN BE DIVIDED BY 3+3+3

THE 4 CORNERS PLUS THE CENTER ADD UP  $1+3+7+9+5=21$  (21 IS THREE TIMES 7) AND THREE TIMES IT FEELS "THE WORLD".

THE MAGIC RECTANGLE OF 9 STARTS WITH THE WIZARDIAN AND ENDS WITH THE BROTHER:  $1+9=10$ . THAT INVITES US TO FIND WHERE ELSE THE 10 IS IN THIS MAGIC SQUARE. THE ANSWER IS THAT, WITHOUT US SEEING IT, IT IS EVERYWHERE. , ROUNDING 5 WHICH IS HALF OF 10.

BE SURPRISED:

$$1+9=10$$

$$7+3=10$$

$$8+2=10$$

$$6+4=10$$
