Weekly Time Frame

[TD Sequential Buy Setup Completed - Weekly Time Frame](https://preview.redd.it/ayebfhk3w4m91.png?width=1280&format=png&auto=webp&s=fd394ffb8c18e83ec0ea35a072a7754f323059b6)

The TD Sequential Buy Setup on the Weekly Chart began back in 2021. Candle 1 was recorded the week ending December 3, 2021 and Candle 9 was recorded the week ending January 28, 2022.

The high experienced during the TD Buy Setup phase was \$51.98. Only 3 things can invalidate a TD Buy Setup once it has been completed.

1. Another completed TD Buy Setup \[9 Candles in a row with a Close *lower* than the Close 4 Candles Prior\]
2. A completed TD Sell Setup \[9 Candles in a row with a Close *higher* than the Close 4 Candles Prior\]
3. A price that exceeds the high during the TD Buy Setup phase (\$51.98 in our case) before the Countdown is complete

Neither occurred and the TD Buy Countdown has now been completed.

[TD Sequential Buy Countdown Completed \[13 of 13\] - Weekly Time Frame](https://preview.redd.it/ef1xaxr6w4m91.png?width=1280&format=png&auto=webp&s=70956e4c310ad56d3eb1df9b121f128ebab31897)

In order to be counted towards the TD Buy Countdown, *a candle must close equal to or lower than the low from two candles previous*. The first eligible candle for this is the 9th Candle during a TD Buy Setup.

To record the 13th candle of a TD Buy Countdown, in addition to the italicized text above, the candle close must also be below the lows of Candle 8 and Candle 11. Candle 8's low was \$27.56. Candle 11's low was \$28.34. We closed Candle 13 at \$27.36.

The whole process from the start of the TD Buy Setup to the completion of the TD Buy Countdown took 40 weeks and finally completed this past Friday at market close.

Monthly Time Frame

[TD Sequential Sell Setup and Partial Countdown \[4 of 13\] - Monthly Time Frame](https://preview.redd.it/z6pqfhydw4m91.png?width=1280&format=png&auto=webp&s=3c5c0b87f43b098d19be60d0dffaad3474400194)

The TD Sequential Sell Setup on the Monthly Chart began back in 2020. Candle 1 was recorded in May 2020 and Candle 9 was recorded in January 2021.

The low experienced during the TD Sell Setup phase was \$0.94. In order to invalidate the TD Sell Setup

before the Countdown is completed, 1 of 3 things would need to happen.

1. Another completed TD Sell Setup \[9 Candles in a row with a Close *higher* than the Close 4 Candles Prior\]
2. A completed TD Buy Setup \[9 Candles in a row with a Close *lower* than the Close 4 Candles Prior.\]
3. A price that dropped below the low during the TD Sell Setup phase (\$0.94 in our case) before the Countdown is complete.

Things for you to ponder:

How did the placement of all of RC's share purchases, the 2 share offerings and the Stock Split via Dividend impact market structure?
