The table below the graph will automatically update whenever there is a change to available shares or borrow fee as reported in Fidelity Active Trader Pro. Note that these available shares are different than those reported by Interactive Brokers, which you can find at gme.crazyawesomecompany.com/ and elsewhere. Fidelity's borrow rate has typically moved less frequently than iBrokers. This is a work in progress so I appreciate any comments/suggestions.

Building on FunctionalGray's comment, I've added a simple graph showing how these values have changed over the past week or so (on an hourly basis).
