Question about wallets...

I have my original GME wallet(pc), a new GME wallet (iOS), loopring wallet, and a metamask wallet.... I see that i can import these wallets all into my GME wallet.... This seems hella convenient.... However my question is does this make me less secure? Should I keep them all as individuals? Or am I safe to go ahead with the merge? Thanks for the advice in advance!
Belt buckled and seat back in upright and locked position
