★ 10/10 **Excellent Documentary About A Cult**

The GME saga is certainly an interesting one, especially the side of the dimwitted bagholders that created their own version of a cargo cult. It's truly incredible to see the formation of conspiracy theories akin to Q-Anon being created by those without even a tenuous grasp of basic economics. The conviction that the "Apes" have is remarkable, their willingness to throw their life savings down the drain for a failing video game pawn shop is truly something to behold. At the very least, this is a well told cautionary tale that warns of the dangers of betting your financial wellbeing on fiction, conspiracy theories, confirmation bias, and internet cults.
