

Title: Pharma-companies are skyrocketing left and right, isn't that suspicious?

Or somewhat a bit of proof that these companies were being shorted to shit and now hedgies are probably having to close and/or cover due to the state of the overall market. I'm surprised nobody has mentioned it over at the other sub (Im banned from there lol).

It's always been said that GME would eventually have to be closed once the market goes to shit. Guess theyre working their way there by closing out other positions first.
