****We can hit 90 million by then!!**** If you insist on leaving any in a broker, DRS 100% now and buy more after Q3. FOMO could kick in based on Q3 DRS numbers!

#Keys to locking the float:

1) Educate the masses outside of Reddit about DRS.

2) ****Think about trading in your "other investments" for the BEST investment. GME is the ONLY investment with such a massive turnaround plan and short squeeze.**

3) ****Sell out of Etoro, T212, and Freetrade and DRS**** NOW so they can't force-sell and make you miss out on your hard-earned tendies.

4) DRS your IRA with no tax event. (Ask how in PM)
