304M Volume Countdown

304 M Volume Countdown since Dividend date(pivot)

Total Outstanding shares = 304M

week 28/7 : 22M

week 05/08 : 27M

week 12/8 : 41M

week 19/8 : 56.3M

week 26/8 : 25.28M

week 2/9 : 24.46M

Week 9/9 : 41.56M

Week 9/16 : 21.36 M

Week 9/23: 18.38M

Week 9/30 : 17.82

Week 10/7 : 2.63

Total : 298M so far traded

304-298M = 6M to trade before boom a big green dildo.

thesis is 1 cycle of trading must reveal major anomaly in dividend distribution and so forth since dividend is return of capital where it churns out every cycle if short bets go bad or EPS is positive. GME

reminder that there was no trustable pivot date to count the cycle so far. But dividend is here which is a pivot date or starting date to count the cycle.

Few Points:

This is the longest time 11th week so far still full outstanding shares are not traded volume has been setting record, and volume variance is around 20-30% everyday lately if this variance of 20-30% was in price it would be named FOMO by now .
