

Title: Teddy.com and the Teddy book series was published by Teddy Publishing who filed trademarks for several different class codes and I believe one of them, 009, shows why I believe we will get copies of the books via an NFT dividend during the week of December 2nd and December 9th.

I believe Ryan Cohen is going to distribute his new book series to the GameStop retail investors via an NFT Dividend during the week of December 2nd through December 9th.

The [Teddy.com](<https://Teddy.com>) site launched today, November 19th, 2022. The site sells a series of Children's books about Teddy and his family. There was also a Wall Street Journal piece about Ryan Cohen that was published at exactly 12am that mentions the books and seems to be fairly positive.

* The books were published by *Teddy publishing* which filed for several trademarks on January 4th, 2022. The different filings have different classification codes. One is 016 and the other is 009.

What is the difference in Trademark class code 016 and 009.

* Classification code 016 seems to have been filed for the physical set of the book series. Words like Printed, cardboard, paper, etc.

* Classification code 009 was filed for downloadable fiction & non-fiction books.

* After looking into International Classification codes for trademarks (not exactly a hobby of mine) 009 seems to be where Books in the form of an NFT would be filed. Also, once I clicked the 009 in the screenshot above it showed me a list of things that would be classified under 009 and here is one you'll find interesting:

* Also, if you purchase the books it says they will ship in 2-3 weeks.

* What is halfway between 2 weeks from now and 3? December 7th would be Wednesday of that week (right in the middle and exactly 3 months since our last earnings call).

This is also a big "suck it" (D Generation X Style) to the people saying I had my tin foil on too tight on my other post when I speculated he'd distribute the book series as an NFT dividend. This shows they at least had the thought of Teddy Publishing minting NFTs.

I am by no means a Trademark Law or Class Expert so correct me if needed. Or show me where I'm wrong and tell me to suck it.
