

Title: Have any of you seen how several NASDAQ companies announced they are Dual Listing on a block exchange? Solution to naked shorts? Website says "No short selling, no market makers". GME is a good candidate for this.

The benefits of listing on Upstream include:

No Short Selling. Upstream does not permit the short selling of our issuers securities.

Global Audience, including Cryptocurrency. Uniquely, Upstream allows global investors access to U.S. equities using cryptocurrency in the form of the USDC stable coin. This enables issuers to reach new investors around the world and increase liquidity potential.

Transfer Agent Integration. Upstream's U.S. transfer agent deposit and legend lift technology also solves for common deposit and custody problems issuers face.

Web3 Technology. Upstream features high-tech, high-touch onboarding, user-friendly trading tools, and transparency enforced by Web3 blockchain technology to make it both convenient and efficient for international traders to trade securities.

FDIC Insurance: Upstream accounts, U.S. and non-U.S., are FDIC-insured up to \$250,000.

Streamlined On/Off Ramps. Cryptocurrency holders enjoy a streamlined on/off-ramp to/from popular cryptocurrency exchange platforms like Coinbase. US Dollar holders enjoy a fiat on/off-ramp to/from any U.S. or int'l bank when they sell their shares.

Full Sovereign Exchange. Upstream is a MERJ Exchange Market. MERJ is an affiliate of the World Federation of Exchanges. As a fully regulated overseas stock exchange, we are a peer to the OTC markets (i.e. Upstream is not a mini-market like an ATS or MTF). This means qualified issuers may cross-list Upstream securities in other global markets.

Upstream is actively accepting dual-listing applications from issuers currently trading on global markets that are seeking to offer their shares to a modern-day investor pool. Issuers may be able to utilize SEC, OTCQX, Euronext or SEDAR filings to satisfy Upstream's listing and reporting requirements. If you have any public companies that you know who may be interested in listing on Upstream, we would welcome the introduction.

Here is GameStop's (GME) updated daily short volume back to 8-3-09 (1st day the government allowed

the exchanges to sell BUYINS the data on a daily basis. This nonsense has to stop:
