Here are the updated numbers for the Open Interest for GME as of Thursday's closing: At \$27.50, the open interest in the money increased to 27,714 (an increase of 2,224 from the day before), representing \$72,564,500 worth of shares. If GME hits \$30 today, that would put over 58,554 calls expiring TODAY in the money representing \$162,753,225. What do you think will happen if \$162,753,225 of gme shares have to be delivered? If this happens today, GME can go PARABOLIC. At the current price of over \$28 in pre-market, it will squeeze, if it goes over \$30 TODAY, I repeat: TODAY, NOT NEXT WEEK, TODAY, it will go PARABOLIC.
