Edit: \*\*TL:DRS: Citadel swaps are real and RC knows. Citadel is fukct, SHFs are fukct, banks are fukct, markets are fukct, the economy is fukct, its all fukct. DRS your shares and HODL.\*\*

I'm a quiet ape. I've been here since before the beginning, watching, buying, learning. I'm not a financial ape, just a humble ape with a knack for patterns and big pictures. [I have 496 shares purchased directly through CS and 100% DRS in my name]([https://www.reddit.com/r/Superstonk/comments/xpkkhz/i\\_put\\_my\\_money\\_where\\_my\\_mouth\\_is\\_428\\_for\\_the\\_bot/](https://www.reddit.com/r/Superstonk/comments/xpkkhz/i_put_my_money_where_my_mouth_is_428_for_the_bot/)). Everything below is my own due diligence, is not financial advice. We are individual investors who happen to share common end goals. I chose to share this theory because this community has given so much to me, most importantly this investment opportunity. We become stronger through community, through research, strength in numbers, and in anonymity. Internet points mean nothing to me and I'm happy to forever remain anonymous.

\*\*First, if you aren't familiar with the Citadel Cycle Swap Theory, or need a refresher\*\*, go read my posted titled [Citadel swap cycles, Headphones, the meme basket, and the tombstone tweet. A detailed look at how we got here.]([https://www.reddit.com/r/Superstonk/comments/vn0kyi/citadel\\_swap\\_cycles\\_headphones\\_the\\_meme\\_basket/](https://www.reddit.com/r/Superstonk/comments/vn0kyi/citadel_swap_cycles_headphones_the_meme_basket/)) "MEME STOCK" = Popcorn. At the time (due to my first post??) even "popcorn" was banned. The rest of this post will make a lot more sense and the read doesn't take too long.

Seriously, you're doom scrolling Superstonk New upvoting purple circles, go spend a few minutes and read it.

\*\*Then go check out my short update on August 9th\*\* [REVISITED: Citadel Cycle swaps and RC 11 dimensional chess. Recent action hints I was right?]([https://www.reddit.com/r/Superstonk/comments/wkhitl/revisited\\_citadel\\_cycle\\_swaps\\_and\\_rc\\_11/](https://www.reddit.com/r/Superstonk/comments/wkhitl/revisited_citadel_cycle_swaps_and_rc_11/)) for a fascinating "in the moment" read on what was about to happen, and my call on BBBY.

I apologize for the term "meme" but im lazy and for this post it works. I detest the MSM use of the term.

# Tinfoil moon hats strapped on? Buckled up? Let's jump in!

\*\*Scientific Method\*\*

\*noun\*

1. a method of research in which a problem is identified, relevant data are gathered, a hypothesis is formulated from these data, and the hypothesis is empirically tested.

<https://i.redd.it/yngxh0n8nfq91.gif>

In other words, we have a problem: \*\*The major market participants and regulators as a whole are complicit in criminal market manipulation to destroy companies and profit.\*\*

I've gathered the relevant data from Citadel's own reporting and used readily available market capitalization data to spot a unique pattern.

Next, we need a hypothesis to test.

The hypothesis as outlined in my previous posts:

1. **Citadel** (among other market participants) are involved in large off the official books swaps involving GME, Popcorn, BBY, EXPR, KOSS, BB, and NOK. Ryan Cohen knows this.
2. RC Ventures has made two large GME stock purchases, each time causing these swaps with popcorn to flip against Citadel. Approximately 133 days after the first swap flip against Citadel, we had the January 2021 sneeze.
3. **August 15th 2022** was approximately 133 days after the swaps flipped against Citadel for the second time. Therefore, these stocks should spike and/or act oddly the week of August 15th 2022. This spike or odd behavior should be less than Jan '21 because RC ventures purchase was only 1.6% of the company vs 9.6% in August 2020.

#### **\*\*THE TEST PART I: SHOW ME THE DATA\*\***

Pictures are worth a thousand words: here are stock prices, last 3 months for GME, popcorn, BBY, and KOSS all spiking exactly as predicted:

And my favorite because no one is talking about EXPR, anywhere. It just magically follows and no one would be the aware if it's buy button wasn't removed in Jan '21.

Those are some very volatile yet coordinated jumps across a unique set of stocks. It seems like they are pulling up the entire market:

Note: Crypto starts crashing on Saturday August 13th. Liquidity? HKD can only go so far (keep reading for the HKD tie-in)

**\*\*THE TEST PART II: RC KNOWS\*\***

**\*\*A key piece of the hypothesis is RC's awareness of these swaps and is making financial moves and communicating via twitter based on this knowledge.\*\***

[August 16 and 17th RC sells entire BBY position for \$68.1M profit.](<https://www.thestreet.com/memestocks/other-memes/ryan-cohen-made-a-very-profitable-trade-with-bed-bath-beyond-stock#:~:text=GameStop%20Chairman%20and%20activist%20investor,after%20the%20news%20was%20released.&text=Ryan%20Cohen%20sold%20all%20of,halting%20the%20BBY%20meme%20rally>) This sale then causes the entire stock market to crash /s

# Or

It took nearly three weeks for Citadel and company to swallow the load and we appear to be back on the same algo downward slope as before that August micro sneeze.

RC ventures has made four declared financial transactions, two GME purchases (technically August 2020 was two purchases 5,800,000 shares and 415,326 making it five total declarations), one BBY purchase, and one BBY sale.

The two GME purchases led to sneezes and the only sale occurred during the second of these sneezes. I lost several nights sleep debating investing in BBY options after my post in June, I didn't. However, I think it was a win win for RC. He either gets what he wants from BBY and can fight Citadel on two fronts, or he pulls the rip cord during the inevitable sneeze. He just needs to know which path within the 133 days. These are my own opinions and, I for one, am happy to see that gain porn!

**\*\*RC knows. Warren Icahn knows.\*\***

\-----

**\*\*CONCLUSION: HYPOTHESIS IS CORRECT, SWAPS EXIST AND MANIPULATE THE MARKET\*\***

>Both times RC ventures has made GME purchases, the swaps with popcorn flip against Citadel, and approximately 133 days later all hell breaks loose! To my knowledge, no other theory, or TA projecting this behavior.

# SO WHAT? Why does the Citadel Cycle Swap Theory matter?

> \*\*It means there are tens or hundreds of millions, maybe billions, of synthetic shares in the market.\*\*  
>  
> \*\*It means we must HODL! Patience is on our side\*\*  
>  
> \*\*It means that RC is watching and will strike at exactly the right time.\*\*  
>  
> \*\*However, for it to be the right time, we must first DRS.\*\*

Thank you for reading. At this time, please slowly and carefully remove your tinfoil moon hat and set it down. Close your eyes. Take a deep breath. Exhale. Breathe slowly. Think about what you just read for a minute or...ten.

\*\*This theory actually isn't crazy.\*\*

1. I've shown the numbers.
2. u/criand has posted dozens of amazing DD posts. [Go read everything he/she/it/they/them/etc has written here](<https://www.reddit.com/user/Criand/submitted/>)

  2. Take special note of the second paragraph:
  3. "\*\*\*where investor holds long positions in corporate debt\*\* \[GME stock\] \*\*but also larger positions short positions via swaps\*\* \[take my popcorn, i'll take your GME and sell it short\]."
  4. That sounds exactly like Citadel Cycle Swap theory. Am I the only one?
  4. Actually no, because this is exactly what [ARCHEGOS]([https://en.wikipedia.org/wiki/Archegos\\_Capital\\_Management](https://en.wikipedia.org/wiki/Archegos_Capital_Management)) was doing.

# BONUS tinfoil hat time:

Remember that whole HKD thing? That was weird, really weird. Here it is to help refresh your memory:

<https://preview.redd.it/p8y6zd8bofq91.jpg?width=1125&format=pjpg&auto=webp&s=e80f25710647b3fde223549a6a45d7613bea36f9>

It peaked August 2nd and returned to ~\$200 on August 9th. If someone sold lots of HKD August 2nd and 3rd, trade settles August 4th or Friday August 5th.

Monday August 8th pre-market and intraday spikes on all the meme stocks with huge volume. Go look at the charts above and the REVISIT post linked at the top.

\*\*GME Peaked August 8th:\*\*
