Have you built a plan to get your GameStop fortune safe?

I have a substantial part of my money in an IRA that I cannot move, and I am hopefully that Fid survives this collapse... because, that's where 90% of my \$\$\$ will be.

The other 10% will be at a broker, but as soon as my trades settle, I will be moving it to a local community bank, and then moving from that bank to multiple other small banks closer to the FDIC insured limits. (\$250K indiv., \$500K joint)...because that's all you'll end up with if your millions land in a bank that goes insolvent.

Lastly, I know DRS is the way, etc... but where is Computershare's money? How do they insure assets? (I don't actually know, but I think it's kind of important to figure out... fast...if you are DRSED?)

Anyone else have a plan?
