I think that the statement is a nod to Bozos that his ambition is to open a worldwide marketplace to better/rival than current ones.

The books show us that his story is one of ambition/morals & amazing stories that will be fantastic to read to our children & install great ethics to a new generation.

There are some great pics in there too that is a nod to us all.

it will be a best seller that the shf

should buy & get an adult to read to them even though we know they wont be able to understand, as they have no morals ,ethics or understanding of being genuine.

my speculation is along with Gamestop exchange/NFT marketplace/■B■Y there will be a new one stop online shop for all your needs worldwide marketplace.

Wouldn't it be great to integrate all the above in a place where the boss is a genuine decent person that has a following that grows by the day & understands the current events & has great ethics.

We are all DRS'ing our shares to expose the fuckery that has been the scourge of companies being robbed by shf for years running companies into the ground & i truly believe that Mo'ass is inevitable & once exposed will change the markets for the better.

It's all coming, time will tell we buy we drs we wait we win.

I just love the stock!!

What a time to be alive it is RC can just sit back as do we & watch it unfold.

I also would like to know that story that WSJ spewed was just a story.

Although it comes across as well written it also comes across as fake, putting RC's meetingsTweets down, quotes that are old.

RC just tweet that its fake news there is no way he gave them an interview imho.

anyway I'm off to finish painting my kitchen have a great day apes!
