I've had a gamestop wallet for a few months and just downloaded the iOS version.

I'm new to NFT and crypto wallets, is it normal that they ask for my secret phrases ?

I thought I could just put my wallet address and my password to access it like I would put my id and password to access from another device, but I don't have this possibility.

It doesn't seem to be like : access your wallet from another device, but instead recover your wallet. Is that normal ?

I've read in here that there was some fake GameStop app so I want to make sure I don't put my secret phrases in the wrong place.

Also, if I recover my wallet on my iOS GameStop wallet, will I still be able to access it from my computer?
