304 M Volume Countdown since Dividend date

Total Outstanding shares = 304M

week 28/7 : 22M

week 05/08 : 27M

week 12/8 : 41M

week 19/8 : 56.3M

week 26/8 : 25.28M

week 2/9 : 24.46M

Week 9/9 : 41.56M

Week 9/16 : 21.36 M

Total : 248M so far traded

304-248M = 56M to trade before boom, almost there.

thesis is 1 cycle of trading must reveal major anomaly in dividend distribution and so forth. dividend is return of capital where it churns out every cycle if short bets go bad or EPS is positive. GME

Few Points:

This is the longest time 8 weeks so far still full outstanding shares are not traded.

MACD turned green, the shares left to be traded to complete a cycle is in the field of shorted /Borrowed shares

Note NFA
