Foreword:

You: "Tell me of Perseus, Papa Ignoble?"

Me: "Come close, gather 'round my son, and join me at the hearth. Listen well to my tale."

Ryan Cohen and his expanding Merry Band of Badasses established a rally point in Gamestop via the turn around. They are using the company Gamestop as a vehicle for innovative change in the socio-economics civilization that probably should have already been happening over the last 40~ years. GMERICA Entertainment, Blockchain Integrations, and the NFT Platform are all troop movements to gain ground on the metaphysical 'big-bad'.

Main:

**\*\*1.\*\*) If I had to guess, I would say that the Merry Band of Badasses have acquired the meat and potatoes of Loopring as a corporation. They likely purchased either a (restrictive?) License to or the entirety of the Loopring Patent regarding Blockchain Decentralized Exchange(s). This would give them leverage against anyone in Finance, Commerce/Industry, or the Government giving them a hedge against corruption, cronyism, or metaphorical kill-switches. It also creates a demand from their peers in the market(s), "Get on board, get with it, or get out of our way!" This would explain why they have so many direct and indirect integrating partners. This would explain the tide of the Government and private financial cornerstones of Wallstreet turning away from Banks and Hedgies involved in this mess. Think Congress reevaluating Family Office Taxes, think the DoJ and SEC moving into CBOE in Chicago, think OCC, NSCC, DTCC et al gradually making policy changes to ensure that when the economic draw down (fallout from naked shorting and swaps) happens that the United States Economy will survive.**

**\*\*2.\*\*) The Loopring DEX has been built as Gamestop's NFT Platform while integrating Inter-Planetary File System by Piñata. You have Ethereum, (Layer 01). Then you have Loopring, (Layer 01). Then you have Loopring (Layer 02). Then you have the Loopring DEX known as Gamestop's NFT Platform. This entity has been built to uniquely identify every asset with a unique identifier as to prevent deception or fraud. This entity has also been built to allow integration from every proposed partner who wishes to work with the Platform while adhering to the Terms of Service/Terms of Use that prohibit certain actions and behaviors. This is where the direct partners like Loopring, Immutable X come in. This is where their respective partners also come in. A rising tide lifts all boats, but the NFT Platform is a digital city. There's room for everyone who wants to put skin in the game.**

**\*\*3.\*\*) Gamestop has successfully filed with the SEC to act as an Agent or Trustee of another corporation. This allows them to handle the Securities and Stock of \*other\* corporations, in example a cell corporation or division operating under their umbrella. This means they can not only operate GMERICA Entertainment LLC (which has subtly been registered as an entity in nations all over the world), but create & distribute company stock on GMERICA's behalf. They can also officiate acquisitions and mergers involving GMERICA or any cell corporation or division under their banner. They could even reverse-merge with GMERICA allowing GMERICA to be a parent company of Gamestop. (Think Alphabet and Google.) They are free to restructure their developing technology conglomerate at will.**

**\*\*4.\*\*) I believe that Private Equity had worked together with Banks and Hedgies to establish Swaps between stocks that were Naked Shorted directly or through ETFs (Meme Basket). Ryan Cohen**

established a position within BoBBY for the purpose of Activism Investing to destabilize these Swaps. He removed the previous executives due to them running BoBBY into the ground, lessening Bearish Confidence in BoBBY. He initiated a turnaround by installing new executives who all specialize in preparing corporations for Acquisitions and Mergers. He seems to have reached an agreement with the Board of Directors. They seem to be following a plan congruent with the Gamestop Turnaround. Thus, the Naked Shorts and Swaps involving BoBBY are destabilized. Directly or indirectly Swaps against Naked Shorts on Gamestop are destabilized.

**\*\*5.\*\*) The Acquisition or Merger with GME(RICA).** BoBBY has a Market Capacity of 607,678,132 by way of 79.96M shares at Market Value. Reported Annual Revenue of 7.868B. BoBBY has recently acquired new financing, secured supply and logistics, and is on it's way to a turn around with a still-building rollout from the Board of Directors/Executives. Assets under management, they could sell BaBY for \$2-4B. They could also keep BaBY and be acquired as a whole. How? Gamestop has \$900m~ in cash, and a Revolving Credit Facility amounting to \$500m~.

Gamestop has 304.52~ million shares available to the public as well as 5.00~ million preferred stock, and 8~ million Class A Common Stock available as compensation and incentives to their employees. We'll say 318 million even. They still have a ceiling of 1,005,000,000 Class A Stock, leaving roughly 682~ million available for the Board of Directors to work with. What can happen in an Acquisition or Merger? Stock Distributions. They can afford to enfranchise BoBBY/BaBY Holders.

- \* If BoBBY rolls into GME then BoBBY holders will likely get GME(RICA) Stock.

- \* If BoBBY spins off BaBY then BoBBY holders will likely get BaBY Stock.

- \* If BoBBY spins off BaBY, and then BaBY is acquired by GME(RICA) what does it mean? If this happens BoBBY holders keep their original investment in BoBBY, they get BaBY Stock, and they get rolled into GME(RICA) when the acquisition happens. (\*Would this be a Grand Slam or a Triple Play for BoBBY Holders\*?)

> [I am holding out for Option 3, because it is a Jackpot, Maximum Moon Tickets!](<https://i.imgur.com/oV9iHdc.png>)

**\*\*6.\*\*) There are two ways you can close out all trading on a company. Withdrawal from the DTCC/Cede & Co. Acquisition or Merger with another entity. Not even bankruptcy/insolvency closes trading or removes shares. I don't think Gamestop's stock will be fully direct registered for a few more years. I don't think that Gamestop is ready to prove that the DTCC is acting in bad faith as a Fiduciary of Gamestop Stock.**
