I've been saying it for a long time. Now I'm more convinced than ever that all Redditors who own GME already did their first DRS or they're not going to. Yes, I know everyone continues to add more shares, but our new account growth is quickly drying up and our overall DRS rate could drop significantly.

#It is critical that we educate the masses outside of Reddit about DRS. There are MANY millions of GME shares held by people outside of Reddit that have no clue what DRS even is. If you'd like to see what you can do to help educate others, please PM me.

■■■■■■■Other considerations:

1) People with money tied up in other investments could convert those to GME and DRS.

■■■■■

2) People with shares in brokers that will not DRS (Etoro, T212, Freetrade): think about selling and re-buying elsewhere!! They don't have shares anyway, so selling hurts nothing. Don't trust your millions to a broker that won't transfer. Just read their TOS!
