

Title: Europoor asking : when we get 51% of #GME, will we be able to ban tokenized stocks ? Or ask for real collateral for those ? And why isn't GameStop not doing it now ?

I mean we really missed this one and we are all discovering the scam behind those tokenized stocks probably involved in short ability to locate shares.

And I am not even talking about all the apes who bought GME on FTX and lost everything.

I mean it's just really bad for GameStop and it's shareholders so I wonder why it's still going on ! Could we ask IR to work on a vote about that ?

Thx for your answers !
