# Link.cryptoToFiat

The crypto to fiat functionality is available in SDK v1.21.3+ and is a collaboration between ImmutableX and Moonpay.

The exchange process allows users to sell crypto held on L2 on the ImmutableX platform directly for fiat funds. These funds will be deposited directly into the users nominated bank account. There is no gas fee for this exchange, only a [Moonpay transaction fee](#).

The withdraw happens directly on L2 via the transfer to Moonpay accounts.

## ⚠ MINIMAL WITHDRAW AMOUNT

There's a minimal withdraw amount of 0.015 ETH.
