/u/ortex_official, regarding the “glitch” in your system with respect to GME’s data. You have stated that transparency around this issue is important to you.

If the data was corrupted by an outside data provider, name the source and show the raw data sets.

Show us that your money is where mount’s at and that you truly wish to be open and transparent. The whole financial sector has shown that they truly deserve ZERO trust from retail investors.

Like they say in the OG sub were this whole saga started; proof or ban!
