It is really unbelievable what you have to do to verify your property.

Transfer orders may be processed by brokers for weeks in the digital age.

No message if the transfer failed or was rejected.

Without a really well done guide (thanks at this point to the site which explains it step by step) many, including me, would not even get this far.

IBKR has already exchanged the euros I transferred back into dollars 3 times. Thank God I transferred enough to convert the currency back and still initiate DRS. (I DRS brick by brick)

After the transfer from my broker has worked 3 times normally I had to start a cross-border delivery now. Previously I waited 4 weeks for the transfer and only after I asked I was told that IBKR rejected the transfer.

After today finally the shares were transferred allegedly the transfer system of IBKR has problems and I should verify the request again via a menu "confirm open tasks", but this was nowhere to be found.

Now the transfer system finally works again and the next 1,000 GameStop shares are on their way to the safe harbor.

This is a message to all fellow apes out there:

Never give up! DRS is the way! Ape helps ape!

Can't stop, won't stop - the Game will stop!

BUY HODL DRS
