I was searching around for something to track a crypto portfolio, and I came across CoinGecko and decided to search for GME for fun. Found this:

<https://www.coingecko.com/en/coins/gamestop-finance>

Check out this chart on March 23, 2022:

Now check out our favourite stonk on the same day:

Right before it ran up above \$40.

Now check out this coins chart on July 1, 2022:

And here's GME on the same day:

But the correlation seems to end there. But seems sus to me.
