Bot for IRA shares with brokerages?!

 Discussion / Question

Wouldn't it be great to have a bot to record IRA shares with brokerages to see how much of the remaining float is actually outstanding but unable to DRS?

I can't see how there is a remaining float. Maybe capturing this data could help GameStop or investors to enforce a share recall. Not to take away from DRS (as those are most important) but to be able to log to the bot in GMEOrphan and a pinned posted in superstonk would be awesome!

Anyone else?!?
