Title: Not directly related to GME, but the context shows that DRS is the way! If it ain't in your name, you

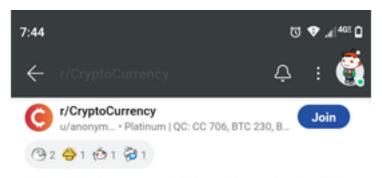

don't own it!

## FTX, 3AC, Voyager, Celsius, Alameda, Hodl Do You Realize What They've Done?

## DISCUSSION

This is so important

Celsius, FTX, Alameda, Voyager, HodlHodl, 3AC all took Bitcoin that wasn't theirs dumped it, lost it or sold coins they didn't have bringing the prices super low and then declared bankruptcy so they don't have to repay it meaning the price doesn't get to come back.

They have all crushed the price of real cryptos with coins that weren't theirs/they didn't have because people trusted them.

Imagine the prices we would be at if they didn't/couldn't do this, take control of your coins for everyones sake. BTC would probably be above 40K today if these companies weren't recklessly gambling with our coins or had to buy them back.

PLEASE spread the message, take control of your keys, fuck these snakes and stop letting them manipulate markets, walk away leaving you with nothing when they lose. This is what crypto was made for.

Edit: It's been reported FTX has an 8 Billion dollar hole. My God.
